

Wedgwood Country Club “E-Z Pay” Membership Plan

Wedgwood C.C. “E-Z-Pay” Membership Plan is designed for those multifaceted and corporate minded individuals that enjoy playing the game of golf, but can’t fully commit to membership.

Because we understand, our E-Z-Pay plan allows you the flexibility to pay for your own personal golf needs one day, and pick-up your clients or friends fees the next. E-Z-Pay gives you the power to control how much you spend, how often you spend it, and on whom, all the while, saving you money on greens fees, cart fees, and pro shop merchandise .

Here is how it works.

The prospective member is asked to complete the “E-Z Pay” Membership Application and establish a baseline credit amount with the club of \$750.00 at the beginning of each year to activate their yearly membership, and be considered a “Member in good standing” with the club. Once established:

The Credit amount may be used in the following manor throughout the course of the year:

- Member may charge greens fees (member fees as well as guest fees) against their credit, and receive a \$5.00 discount off regular rack rates for each round played.
- Member may charge cart fees (member fees as well as guest fees) against their credit and receive a 10% discount off regular rack rate cart rates.
- Member may charge pro shop food and beverage and other merchandise (not including “hard goods”) against their credit at a 10% discounted rate.
- Member may pay for WCC handicap serves fees with their credit.

Membership Limitations and Suspension policies are as follows:

- Member Credit charges can not be used at Divot’s Lounge or against any on-course food and beverage purchases made at club.
- Member Credit can not be used for any “hard goods” (golf clubs, golf bags, etc.) that may be sold in the pro shop or for any non-club related fees other than those listed above.
- Once the member has exhausted their membership credit, any outstanding balance for chargers incurred must be paid by cash or credit/debit card at time of transaction.

- Member will have the option of adding additional dollars (in \$250.00 increments) to their membership account at any time during the life of their membership or after their account credit has been exhausted.
- Members, who fail to add additional dollars to their account once exhausted, will have their membership suspended until such time as they have added additional dollars to their account. During the suspension period, the suspended member may still play at the club, but will no longer receive discounts related to greens fees, cart fees, pro shop food and beverage, or merchandise.
- Once the member has re-established credit with the club, their privileges shall be reinstated.

Membership Credit Balance and future year's Membership:

- Any member who ends the year with a credit balance will have their credit carried forward and added to their upcoming year's credit line.
- In order for the member to receive all the benefits associated with membership and to be considered a "member in good standing" for the following year, the member will need to re-establish their baseline credit amount (\$750.00) for that new year, by the first of the year. Once the baseline credit has been established, the members previous years credit shall be applied and they will receive all the member benefits outlined above.
- Those members not wishing to, or who are unable to, continue membership for the following year, will be able to use the remaining credit on their account, but all amounts charged against the credit shall be at current rack rates. No discounts will be afforded them.
- Balance of any money's that remain on a non-returning members account is not redeemable for cash or other monetary instrument and may only be redeemed as provided for by the plan.
